105/PC V

Introduction

A **DIFFERENT** and **PROFESSIONAL** hanger. It is a renovated **rubber** hanger manufactured with high performance raw materials providing improvement in the vibro-mechanical field.

105/PC V is more than a hanger. It is an **REVOLUTIONARY** acoustic hanger for suspended ceilings with profiles type **T-24** or **T-15** or primary universal profile and secondary profile with click.

105/PC is an **ULTRA FAST** fixation considering that it has the insertion system (**CUG**). **Our engineers** work every day for your security. (*We are the only ones who can manufacture it*).

SUSPENDED Ceiling

KEY Features

105/PC V: its direct fixation to ceiling profiles type **T-24** or **T-15** makes him an unique product. This hanger is designed to eradicate and attenuate vibrations from units with rotating and repetitive blows above 20 Hz. We find the most powerful **RUBBER** on the market.

(A) **Green rubber:** TC-4/GPN

Loads between **8-30 kg**.

Resonance Frequency **7 to 15 Hz**.

SUSPENDED Ceiling

(B) External framework: it is manufactured from high performance galvanised steel **Dx54d + Z140** with a **1.5** mm thickness. It provides stiffness to the system and a fast insertion to ceiling profile.

(C) Metallic bowl-shaped piece: it is manufactured from high performance galvanised steel **Dx54d + Z140** with a **1.5** mm thickness. It provides resistance to the mechanical traction of the system.

BREAKING POINT: the thread turn are broken above 250 kg.

LABORATORY Test UNE-EN ISO 10846-1:2009

Acoustic and vibrations. Laboratory measurement
of vibro-acoustic transfer properties of elastic
elements.

Certificate of COMPLIANCE

SENOR certifies:

All our **construction** products for suspended acoustic ceilings under slab, including **Mod. 105/PC V**, have an optimal lifespan of **10 years** provided that the installation is carried out under **ordinary environmental conditions** and are not exposed to chemical components that could degrade the product. The **Mod. 105/PC V** strictly complies with **UNE** (Spanish Association for Standardization) **UNE 100-153-88**: air conditioning; vibration insulators: design criteria.

SENOR declares under its responsibility that the following components for suspended ceiling in buildings strictly complies with the technical sections of installation mentioned in the technical documentation of the product.

Warning Relevant information

SENOR reserves the right to make changes in specifications at any time without prior notice. It is a responsibility of the user to use the latest and updated version of the product data sheets. A copy of which will be available on request. This information and, in particular, relative recommendations for the application and final use of the product, are given in good faith, based on SENOR knowledge and experience of its products, provided that they are correctly installed in ordinary circumstances and within its useful life.
